RE: Resource Recovery Certification RR0268A, Closure Notification,
McDonnell Douglas Tract I

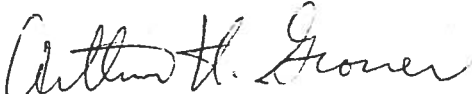

Dear Mr. Haake:

The Permits Section of the Missouri Department of Natural Resources' Hazardous Waste Program has reviewed your letter dated May 25, 1999, to Mr. Daniel A. Carey, Environmental Engineer, regarding the closure of equipment pertaining to the methyl ethyl ketone hazardous waste recovery process. In your letter, you described the final disposition of the equipment. The equipment will be decontaminated and sold as scrap metal for recycling. The resource recovery process, RR0268A, is considered closed per 10 CSR 25-9.020 (3)(E)(1) based on the description of decontamination activities and the disposition of the unit as detailed in your letter.

If you have any questions regarding the above, please call Mr. Carey, of my staff, at (573) 751-3553.

Sincerely,

HAZARDOUS WASTE PROGRAM

Arthur H. Groner
Chief, Permits Section
